INTERNSHIP REPORT PRESENTATION

Internship Topic:UX/UI Design for Residence Verification Application

Submitted By:Vrishti Tyagi

Enrollment Number:25scs1003001122

Program & Semester:B.Tech cse – sem3

Organization Name:HelloAye

About the Organization

HelloAye

- HelloAye is a technology-driven organization focused on developing innovative digital solutions.
- The organization emphasizes user-centered design, modern development practices, and scalable applications.
- During my internship, I worked as a UX/UI Design Intern on the Residence Verification **Application**.

Project Overview

Residence Verification Application

Objective:

To design a modern and user-friendly application that simplifies the residence verification process through an intuitive interface.

Key Features:

- User Login
- Home Dashboard
- Residence Verification
- Profile Management
- Visit History
- Earnings Dashboard
- Settings & Security

Problem Statement

Existing Challenges

- Manual verification processes
- Time-consuming workflow
- Difficult navigation
- Poor user experience
- Lack of organized verification records

Proposed Solution

Develop a clean, intuitive, and efficient digital interface that improves usability and simplifies the verification process.

My Role & Responsibilities

Role

UX/UI Design Intern

Responsibilities

- Designed application screens using Figma
- Improved user experience and navigation
- Created Homepage UI
- Designed Login and Profile screens
- Designed Residence Verification module
- Improved visual hierarchy and consistency
- Collaborated with the team on design improvements

Tools & Technologies

Design Tools

- Figma
- Wireframing
- Prototyping

Design Principles

- User-Centered Design
- Design Thinking
- Visual Hierarchy
- Accessibility
- Responsive Design

Conclusion

The internship at HelloAye provided valuable industry exposure and practical experience in UX/UI design. Working on the Residence Verification Application helped me strengthen my design skills, understand user-centered design principles, and contribute to developing an intuitive and user-friendly interface.
